

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Proceedings of the Boston Society of Natural History. April, 1846. From the Society.

The Literary Record and Journal of the Linnean Association of Pennsylvania College. Vol. 2, No. 7. From the Association.

Fifty-ninth Annual Report of the Regents of the University of the State of New York. Albany, 1846. From the Regents.

Dr. Elwyn presented a large number of works, chiefly on subjects of Natural Science, originally forming part of the collection of the late Dr. James Mease.

---

A letter was read from Wm. M. Baird, Esq., dated Reading, June 1st, 1846, acknowledging the receipt of his notice of election as a Correspondent.

Dr. Leidy read a paper intended for publication, entitled "Anatomy of Spectrum femoratum, Say," with numerous drawings, representing the different parts and organs of the insect. Referred to Mr. Haldeman, Drs. Hallowell and Goddard.

Dr. Morton presented a letter from M. Lamarepicquot, a French naturalist, who has established his residence on the Upper Mississippi, with the view of investigating the habits, &c., of the Mammiferae of that region. The letter was addressed to F. Markoe, Jr., Esq., Corresponding Secretary of the National Institute, and by him referred to the Academy through Dr. Morton, with a request to examine into the state-

ments which it contained. These were in reference to a discovery made by the writer and supposed by him to be new, of three distinct excretory passages, a urethral, a vaginal, and an anal, in the female *Gopher*, (*Geomys bursarius*?) A number of specimens had been examined, and this peculiar conformation found to be constant.
